

Transforming How Businesses **OPTIMIZE ROUTING**

WorkWave Routing Engine is a simple solution to complex logistical problems.

Increase the value your solution provides to your customers by solving complex routing needs through integration. WorkWave Routing Engine's powerful algorithm increases operational efficiency of any business with routing needs. The easy to use, robust API integrates with your business software to provide a powerful route optimization solution.

INPUTS ARE CONFIGURABLE TO SPECIFIC USE CASES:

Vehicle Constraints

- Availability
- Specified Start / End Locations
- Working Hours
- Flexible Start Times
- Limit Drive Time / Orders Served / Distance Traveled
- Load Capacity
- Geographical Area

Order Constraints

- Eligibility
- Multiple Load Capacity
- Vehicle Assignment
- Type of Order (Pick Up, Drop Off, Service, Pick Up & Drop Off)
- Importance
- Hours of Service / Delivery
- Multiple Time Windows

If your customers' businesses involve the movement of goods and/or people, chances are they have a need for an optimized routing engine built with APIs to embed into your enterprise software.

Industries That Can **BENEFIT** From Routine Engine

If your customers' businesses involve any of the below activities, they would benefit from an integrated routing solution:

- Sales reps with specific territories
- Field techs with multiple appointments per day
- Regular equipment inspection, testing and certification
- Delivery to end customers

- Manufacturing facilities to warehouse delivery needs
- Recurring or one time orders
- Multiple location pickups, emptyings and drop offs
- Fixed service frequencies and on demand services

Your customers will be able to solve complex routing problems:

- Increase efficiencies by 30%
- Provide accurate arrival estimate
- Reduce route planning time
- Plan 20% more deliveries
- Decrease driving time & mileage

- Balance workloads
- Decrease fuel and maintenance costs
- Offer full system lifecycle services
- Generate new revenue streams
- Enhance current solution with optimized route planning

An integrated solution saves you time, money, and development resources to deploy towards strategic product goals. Integration with Routing Engine adds more value and functionality to your solution immediately.
