

The Wide-Reaching Benefits of **ROUTE OPTIMIZATION**

If your business calls for time spent on the road, you need an optimization engine built with APIs to embed into your enterprise software. The powerful route optimization capabilities of **WORKWAVE ROUTING ENGINE CAN HELP YOU IMPROVE THE EFFICIENCY OF YOUR OPERATIONS.**

INDIVIDUAL DRIVERS

If you're just starting out with one or two drivers, Routing Engine can help you to achieve more with the same number of drivers.

- Complete more orders in the same amount of time
- Save time with multi-stop sequencing
- Save on fuel and vehicle maintenance with optimized routes
- Meet specific delivery windows as needed
- Provide accurate arrival time estimates for more satisfied customers

FIELD SERVICE WORKERS

You don't need to be in the delivery business to benefit from route optimization. If your field service business travels to homes or businesses to carry out work, Routing Engine can make your operations more efficient.

- Dispatch technicians efficiently
- Optimized routes ensure less time driving and more time serving customers
- Allow for customer-requested time windows
- Quickly recalculate and dispatch routes to account for last minute appointments or cancellations
- Ensure jobs are assigned to technicians with the appropriate vehicle, tools, or skills for the job

TRANSPORTATION INDUSTRY

For larger fleets, Routing Engine turns complex multi-vehicle routing into a fast, simple process.

- Intelligent dispatching to keep your team on the same page
- Route optimization for your entire fleet
- Optimize for delivery windows, worker schedule constraints, drive time limitations, and more
- Sync order details with your routes to ensure loads fit individual vehicle capacities
- Balance workloads to protect your drivers
- Account for road conditions, traffic, stop times, and more
