

ROUTE PLANNING SOFTWARE

For Last-Mile Providers & Field Service Professionals

WORKWAVE[®]
Route Manager

PLAN STRATEGICALLY. ROUTE EFFICIENTLY. TRACK PROGRESS. ANALYZE PERFORMANCE.

When it comes to planning where your fleet will be over the course of the day, WorkWave® Route Manager does all of the heavy lifting to ensure you meet your big picture demands — happy customers, on-time arrivals and 5-Star service. Plus, it offers the flexibility you need to accommodate last minute requests, growth and more while keeping internal/external processes running smoothly. This incredible tool will revolutionize the way you operate with added insight about what's working, what isn't and the power to quickly adjust. WorkWave Route Manager will streamline your operations and position your company for success today and well into the future.

Automatically plan and optimize route plans, streamline scheduling, and dispatch your drivers with ease.

Easily plan your daily, weekly or monthly routes, make real-time adjustments to schedules, and stay connected to your drivers while gauging performance with mobile GPS.

A Logistics Solution THAT FITS YOUR BUSINESS

Meet and exceed customer expectations.

Manage on-time arrivals, last-minute requests and same/next-day commitments more efficiently with Route Manager. You'll have the power to be more accurate with estimations and arrival times, satisfy customer requests and ultimately streamline your business operations.

Build reliable and efficient route plans with the click of a button.

Route Manager takes into account time windows, available resources, requests, and other factors that can impact your plans. Your day is easier when you have 360 visibility and control to adjust routes before and after your drivers start their day.

Make smarter decisions with increased visibility.

Stay connected to driver status, location and Live ETAs to identify when you're ahead of schedule or running behind. Plus, you can collect proof of delivery and requests to reschedule with the mobile app and confirm locations via Mobile GPS. Get the answers you need quicker!

More Than Just Route Planning, IT IS A PROBLEM SOLVING TOOL.

Solve complex pick-up/drop-off challenges that account for rush hour, traffic patterns, load capacity and last minute requests

Collect proof of delivery: photos, signatures, notes and audio

Improve communication with your drivers and customers

Route more efficiently while generating a ~30% ROI

Plan around time-windows and increase on-time arrivals

Keep an eye on performance with Live ETA updates

Integrate your CRM or order management system with our flexible API

Create realistic routes that keep drivers happy and running on schedule

Monitor performance for extra visibility

Implement new processes to achieve maximum efficiency & meet daily targets

Maximize face-to-face time with customers

Project growth and test out new scenarios with simulation planning

“ I’ve been able to
dramatically increase efficiency

in our daily delivery routes and our drivers love having everything pushed to their phones. I can’t speak highly enough about it...and my boss is happy. We’ve easily saved what it costs per month within the first couple days of using it. ”

*Sarah Samuel
Operations Manager, Small Lot Wine*

**Routing efficiently gets you there on time
— and puts money back in your pocket.**
